To protect your designs, the Markup Assist utility is now on a foundation of a new technology called Full Text Markup, or FTM, which represents your drawings as complete and consistent documents. FTM will allow you to enhance your designs at a faster pace and will simplify the implementation of your drawings. The new technology will be integrated with the future releases of AutoCAD and is designed to work with all the new features in AutoCAD. Multiplication and division of group objects: Multiply or divide group objects to express more complicated shapes with fewer group members. To simplify your work, group your objects into a single AutoLISP script. It will save you a lot of time in the future. (video: 4:41 min.) Annotation Manager Find and save annotations from any part of your drawings and files. A click to the right of any drawing, and a right-click from anywhere within a drawing brings up the Organize and Edit Annotations window, where you can create, delete, and rename your own annotations. Also, you can save them as a.PDF (keyboard: CTRL+U) or.DXF file (right-click on a drawing and choose Save As). (video: 3:58 min.) Improved Compatibility of AutoLISP: Take advantage of more functionalities available in the AutoLISP scripting environment. If you already use the AutoLISP debugger, you can use it to better debug your AutoLISP scripts. (video: 2:52 min.) New 3D and Display commands: Drag-and-drop a 3D model onto a page and use the Display commands to quickly and easily view the 3D model in a 2D or 3D view. For example, to view the model in 2D, right-click in the 2D viewport, then choose From 2D viewport. To view the model in 3D, right-click in the 3D viewport and choose From 3D viewport.
