- Shows details about active players, not all players are shown - just the active ones - with information on their

position (flyout), and kill details. - Include an integrated mini-map that does not require a separate program (it maps location on the flyout according to the map's borders). - The count of players for each team can be changed in the registry to display only 1 or 2 teams (the default is 3 teams, e.g.

Red, Green and Blue) or the whole data can be excluded, or only the top 10 players can be shown. - Lets you run a live game view, or map view. Live game view shows your game activity and is running in real time - it shows only the players who are near the map's borders. Map view shows the whole

map, you can zoom in/out for a closer/further view. - A very convenient, fast and simple activation of the Gadget is possible. There are several options to activate and deactivate a summary. You can also turn it off completely. Battlefield 2: Modern Combat 3D is a first-person shooter game
