Mapping Data (exsiting Air Force) in a way that can be. 90 as a short-term low-risk methodology to develop a set of model collimated and in.Q: Why is my C# Timer Not Remaining Idle? I have a C# app that runs a Timer every second. The idea is that the Timer will be running but when the main UI thread is idle the Timer will be suspended and when the user starts typing or clicking stuff the Timer will be resumed. When the main UI thread becomes idle again, the Timer will pause again. That's the idea, but it doesn't seem to be working as I want it to. It seems like when the main UI thread is idle, the Timer is just running. This happens repeatedly until the main thread becomes idle again, at which point it's as if the Timer hasn't been paused at all. Does anyone know why this is happening? I'm not sure what the problem could be. Here's the relevant code: using System; using System.Windows.Forms; using System.Threading; using System.Timers; namespace WindowsFormsApplication1 { public partial class Form1 : Form { public Form1() { InitializeComponent(); } public void Start() { ThreadPoolTimer t = new ThreadPoolTimer(); t.Interval = 1000; t.CancelAfter = 1000; t.CancelIfIdle = false; 0cc13bf012
